

BLOCK CARBON CARTRIDGE CTO-20BB AC-CTO-20BB

AC-CTO-20BB is a solid extruded block which eliminates channeling and bypassing and does not release carbon fines. Its nominal filtration rating makes it excellent for polishing filters and pre-filters in applications which require very fine filtration. Due to very small (5 µm) pores, AC-CTO-20BB is effective in filtration of chosen microorganisms such as giardia&cyptosporidium cysts. The block can be used for treatment of potable drinking water, as well as for industrial, commercial & food services applications.

TECHNICAL SPECIFICATION

| PARAMETER | VALUE |
|------------------------------------|-----------------------------------|
| Dimensions | 508 mm |
| External x Internal diameter | 107 x 29 mm |
| Medium | Water washed coconut shell carbon |
| Lifetime | 3-6 months* |
| Maximum working pressure | 2 bar |
| Maximum working temperature | 50 °C |
| Filtration efficiency (mechanical) | 5 µm |
| Nominal water flow | 1 GPM |

* depends on usage and water conditioning
